Summary

Software Engineer and UW graduate student with 4+ years building production AI tooling, full-stack systems, and high-availability infrastructure. Proven ownership across the product lifecycle, from architecting LLM-driven CLI tools to supporting Tier-1 financial systems, with a focus on developer productivity and operational reliability at scale.

Education

University of Washington — Seattle, WA, USA
Master of Science, Information Management; GPA: 3.98/4 — *Sep. 2025 – Jun. 2027 (expected)*
Specializations: Artificial Intelligence, Product Management.
Coursework: Implementing and Managing GenAI Systems, Product Strategy and Leadership, Cloud Computing and AI.
Honors & Academic Service: Tolo Scholar, Tapia Scholar; Academic Reader & Grader across 6 Information School graduate courses.

Manipal Institute of Technology — Manipal, India
Bachelor of Technology, Information Technology; GPA: 3.7/4 — *Jul. 2017 – Jun. 2021*
Minor: Big Data. Coursework: Machine Learning, Distributed Systems.

Skills

Programming Languages: Python, Java, JavaScript/TypeScript, SQL, C++, Shell Scripting
Backend/Frontend: Django, Flask, FastAPI, Next.js, React, REST, OAuth
AI Systems: Azure AI Search, Microsoft Foundry, RAG, LangChain, Transformers, Agentic IDEs (Claude Code, Codex)
Cloud/Platform: Azure, AWS, Docker, Kubernetes, Version Control (Git, GitHub, GitLab), CI/CD, Splunk, AppDynamics
Reliability Engineering/Infrastructure: Monitoring, Incident Management, Automation, ITSM (ServiceNow), BigPanda, Unix/Linux
Development Practices: Agile, Code Review, Unit Testing, System Design, SDLC

Experience

TestSprite — Seattle, WA, USA
Software Development Intern — *Jun. 2026 – Present*
- Built and shipped end-to-end AI test generation for the TestSprite CLI, bridging terminal workflows with the web portal and enabling 70% of authenticated developers to generate, debug, and run tests directly from the command line.
- Diagnosed and resolved a project-creation failure, unblocking 33% of new developers and establishing a reliable first-run onboarding flow.
- Standardized CLI error handling, structured outputs, and exit codes for headless CI/CD pipelines and autonomous AI agent execution.

UBS — Pune, India
Software Engineer (Platform & Reliability) — *Jul. 2021 – Aug. 2025*
- Architected and deployed AutoFlow using FastAPI, LangGraph, and React, building an internal LLM tool that translates natural language prompts into production Amelia workflows, slashing setup time by 95%.
- Built an Azure AI Search RAG chatbot indexing 20K incident records to automate live diagnosis and resolutions.
- Engineered config-driven Splunk and AppDynamics dashboards across 200+ microservices, cutting incident MTTD by 40%.
- Automated 20+ recurring incident types and operational workflows with Amelia, saving 200+ engineering hours monthly.
- Maintained 99.8% uptime SLA for 5 Tier-1 collateral applications processing $10B+ in daily transaction volume.

UBS — Pune, India
Group Technology Intern — *Mar. 2021 – Jul. 2021*
- Designed 20 SWIFT processing workflows in ARIS, standardizing and digitizing procedures across operations teams to enable automation.

Projects

Generative Sign Language | *github.com/sanaro99/GenASL* — *Jan. 2026 – Present*
- Developed a prototype AI system generating sign language overlays for YouTube videos to support Hard-of-Hearing viewers.
- Implemented media processing pipelines using FFmpeg to dynamically sequence and stitch sign language clips into video overlays.

Global Personal Cloud | *sanchitarora.me/blog/self-hosting* — *Feb. 2025 – Present*
- Engineered a fault-tolerant TrueNAS cloud, eliminating single points of failure through mirrored storage pools and hardware redundancy.
- Designed a cross-continent NGINX architecture with active read/write splitting across two distributed nodes to minimize global latency.
- Deployed full-stack applications and databases via GitHub CI/CD, managing host infrastructure and secure exposure through tunneling.

Certifications

UBS Certified Engineer – Software Engineer, *UBS* — Jun. 2025
Microsoft Azure Cloud Fundamentals (AZ-900), *Microsoft* — Jun. 2025
Microsoft Azure AI Fundamentals (AI-900), *Microsoft* — Nov. 2024

Awards and Recognition

Investment Round Finalist, *Dempsey Startup Competition* — Apr. 2026
Runner-Up, *UW AIMS Product Competition* — Feb. 2026
Quarterly Star Award, *UBS* — Apr. 2023
